LABORATORY REPORT

|                     |                                          |              |                             |
|---------------------|------------------------------------------|--------------|-----------------------------|
| Patient:            | Maria Elena Gutierrez                    | DOB:         | September 22, 1985 (Age 39) |
| MRN:                | MRN-0078234                              | Gender:      | Female                      |
| Ordering Physician: | Dr. Steven Huang, MD — Internal Medicine | Accession #: | NX-20250421-88341           |
| Specimen Type:      | Venous Blood / Urine                     | Collected:   | April 21, 2025 at 07:30 AM  |
| Received:           | April 21, 2025 at 09:15 AM               | Reported:    | April 21, 2025 at 02:45 PM  |

COMPLETE BLOOD COUNT (CBC) WITH DIFFERENTIAL

| Test                          | Result | Units                | Reference Range | Flag |
|-------------------------------|--------|----------------------|-----------------|------|
| WBC — White Blood Cell Count  | 11.8   | x10 <sup>3</sup> /μL | 4.5 – 11.0      | H    |
| RBC — Red Blood Cell Count    | 4.12   | x10 <sup>6</sup> /μL | 3.80 – 5.10     |      |
| Hemoglobin                    | 11.2   | g/dL                 | 12.0 – 16.0     | L    |
| Hematocrit                    | 34.1   | %                    | 36.0 – 46.0     | L    |
| MCV — Mean Corpuscular Volume | 72.4   | fL                   | 80.0 – 100.0    | L    |
| MCH                           | 24.8   | pg                   | 27.0 – 33.0     | L    |
| Platelets                     | 398    | x10 <sup>3</sup> /μL | 150 – 400       |      |
| Neutrophils                   | 78.2   | %                    | 50.0 – 70.0     | H    |
| Lymphocytes                   | 15.4   | %                    | 20.0 – 40.0     | L    |

COMPREHENSIVE METABOLIC PANEL (CMP)

| Test                      | Result | Units  | Reference Range | Flag |
|---------------------------|--------|--------|-----------------|------|
| Glucose (Fasting)         | 112    | mg/dL  | 70 – 99         | H    |
| BUN — Blood Urea Nitrogen | 18     | mg/dL  | 7 – 25          |      |
| Creatinine                | 0.82   | mg/dL  | 0.50 – 1.10     |      |
| eGFR                      | 88     | mL/min | > 60            |      |
| Sodium                    | 138    | mEq/L  | 136 – 145       |      |
| Potassium                 | 3.3    | mEq/L  | 3.5 – 5.0       | L    |
| Calcium                   | 9.1    | mg/dL  | 8.5 – 10.2      |      |
| AST                       | 34     | U/L    | 10 – 40         |      |
| ALT                       | 52     | U/L    | 7 – 56          |      |
| Total Bilirubin           | 0.7    | mg/dL  | 0.1 – 1.2       |      |
| Albumin                   | 3.2    | g/dL   | 3.5 – 5.0       | L    |

THYROID FUNCTION PANEL

| Test                              | Result | Units | Reference Range | Flag |
|-----------------------------------|--------|-------|-----------------|------|
| TSH — Thyroid Stimulating Hormone | 6.82   | mIU/L | 0.45 – 4.50     | H    |
| Free T4 (FT4)                     | 0.72   | ng/dL | 0.82 – 1.77     | L    |
| Free T3 (FT3)                     | 2.4    | pg/mL | 2.0 – 4.4       |      |

**CLINICAL INTERPRETATION / COMMENTS**

Findings are consistent with microcytic hypochromic anemia, likely secondary to iron deficiency; correlation with serum iron studies (ferritin, TIBC) is recommended. Leukocytosis with neutrophilia may indicate an underlying bacterial infection or inflammatory process; clinical correlation advised. Mildly elevated fasting glucose (112 mg/dL) warrants an HbA1c to evaluate for pre-diabetes. Hypokalemia noted — dietary review and possible supplementation recommended. TSH elevation with low-normal FT4 is suggestive of subclinical/clinical hypothyroidism; clinical follow-up and repeat thyroid panel in 4–6 weeks is advised. Albumin is mildly low — nutritional status assessment recommended.
